

KYLIE BI — BRAND DNA v1.0

Design Philosophy & Methodology

01 | Core Motivation

Kylie's design practice begins with a desire to understand problems beyond their visible symptoms.

She is naturally drawn to complex questions, unfamiliar fields, and situations in which existing assumptions may no longer be sufficient. Rather than responding immediately with a visual solution, she first investigates the underlying relationships, identifies the essential problem, and considers what alternative possibilities may exist.

For Kylie, design is not primarily about producing objects. It is a way of thinking, connecting, testing, and making possibilities understandable.

中文工作定义

Kylie 的设计实践始于对问题本质的追问。

她不会停留在事物的表面，也不会急于用一个视觉形式回应问题。她更倾向于理解问题为何发生、不同主体之间如何关联，以及现有认知之外是否还存在其他可能。

设计对她而言，不只是创造结果，而是一套发现关系、建立逻辑、验证设想并传递可能性的方法。

02 | Why I Design

I design to discover possibilities that are not yet obvious, and to translate them into forms that people can understand, experience, and engage with.

我通过设计探索那些尚未显现的可能性，并将它们转译为人们能够理解、体验和参与的形式。

设计的价值不只在提供一个答案，也在于帮助人们注意到此前被忽略的关系、问题和思维方式。

03 | View of Design

Design is not defined by its visual outcome. Visual expression is one of the ways design becomes perceptible.

设计不应由最终的视觉结果定义。视觉表达只是设计被感知、理解和传播的方式之一。

不同问题可能需要不同的媒介：

- 视觉系统
- 品牌传播

- 编辑设计
- 空间体验
- 摄影与影像
- 数字交互
- 服务或策略
- 推测性场景

媒介不是设计的起点。问题、语境和沟通目标决定媒介。

The problem determines the medium, not the other way around.

04 | Relationship with Visual Design

Kylie values visual culture, aesthetics, typography, composition, materiality, and image-making. However, she is not interested in reproducing visual trends without understanding why they work.

Her visual education is driven by a search for principles:

- Why does a composition feel balanced?
- How does hierarchy guide attention?
- How do proportion, scale, rhythm, and negative space influence perception?
- Why can one visual system remain coherent across different applications?
- How can aesthetics strengthen meaning rather than merely decorate it?

I am not interested in following visual trends. I am interested in understanding the principles that make visual communication effective and meaningful.

她关注的不是单纯模仿某种“高级感”，而是理解视觉结构为何成立，并将这些原则迁移到新的语境中。

05 | Possibility as a Design Subject

Kylie is interested not only in solving existing problems, but also in identifying questions that may become important in the future.

Speculative work is therefore not treated as unrestricted fantasy. A speculative project must establish:

- a defined context
- a credible internal logic
- clear relationships between participants
- realistic behavioural or communication conditions
- an outcome that can operate within the proposed world

TYRANNO exemplifies this approach. Although the project is situated in a hypothetical future, its communication system is designed to function logically and practically within that scenario.

Speculation becomes meaningful when possibility is developed into a coherent and actionable system.

推测并不意味着脱离现实，而是在新的前提下完成逻辑闭环，并将一种尚未发生的可能转化为可讨论、可体验、可验证的设计回应。

06 | Creative Methodology

Discover → Connect → Translate → Materialise

Discover

观察表面现象背后的结构，定位真正值得回应的问题，并进入尚不熟悉的领域。

Connect

识别不同信息、角色、文化语境和知识系统之间尚未被注意到的关系。

Translate

将复杂或陌生的理念转化为目标受众能够理解的叙事、视觉语言和沟通结构。

Materialise

选择合适的媒介，使理念成为可以被体验、参与、测试或实施的现实形式。

执行不是与思考分离的末端工作，而是验证设计逻辑的重要环节。

07 | Professional Value

Kylie's value lies in her ability to move between research, strategy, narrative, visual communication, and production.

She can:

- identify the central problem within complex information
- develop original but contextually grounded concepts
- connect research with communication strategy
- select appropriate media rather than defaulting to one format
- translate abstract ideas into coherent audience experiences
- balance innovation with clarity and feasibility
- guide an idea from early investigation to final implementation

她的核心价值不是固定在某一种设计媒介上，而是能够从复杂问题中建立清晰的设计逻辑，并将其推进为完整、可理解且能够落地的传播体验。

08 | Professional Identity

Market-facing title

Communication Designer & Creative Producer

Broader professional positioning

Communication Creative working across concept development, visual communication, narrative systems, and creative production.

Personal methodology

A translator of possibilities.

“A translator of possibilities” 不是职位名称，而是 Kylie 的长期创作身份：发现尚未显现的关系和可能性，并将其转化为他人能够理解、体验与参与的现实形式。

09 | Portfolio Thesis

Kylie Bi explores unseen possibilities and translates complex ideas into coherent communication experiences through research, narrative, visual systems, and creative production.

Kylie Bi 探索尚未被看见的可能性，并通过研究、叙事、视觉系统与创意制作，将复杂理念转化为连贯的传播体验。

10 | Kylie Principles

1. Every project begins with a question.

每一个项目都从一个值得追问的问题开始。

2. Design begins before form.

设计发生在形式出现之前。

3. The medium follows the problem.

媒介服务于问题，而不是反过来定义问题。

4. Possibility requires logic.

可能性必须建立在完整的逻辑之上。

5. Communication is an act of translation.

沟通的本质是转译。

6. Aesthetic decisions must support meaning.

视觉美学必须帮助意义被感知，而不只是装饰意义。

7. Ideas become valuable when they can be understood and realised.

理念只有在能够被理解和实现时，才真正产生价值。
